

Disclaimer

I am not a doctor and make no claim to dispense medical advice or to administer therapy. My specific qualifications are based on completing the Oh Crap! Potty Training Certification Program, with a badge of excellence. Oh Crap! Potty Training does not advocate corporal punishment or shaming of children - no advice or information provided in conjunction with this website shall be construed as such. My potty training advice falls within the purview of this certification, and services come with no guarantees or warranties.

In an effort to get you the BEST help possible with potty training the following statements are what I have found to be true, based on the Oh Crap! Potty Training approach:

These services are for you IF:

- You don't know how to begin potty training, or simply need help as you get started
- You have attempted potty training (using "Oh Crap" OR other approaches) and need additional support
- Your child's age is somewhere between 18 months and 4 years

These services are NOT for you IF:

- Your child is over 4 years old and showing extreme resistance. This warrants more specific assistance than I can provide.
- Your child is under 16 months. It's COMPLETELY possible to have a diaper-less child under 16 months. This is simply a different approach than Oh Crap! Potty Training and is referred to as Elimination Communication. I can pass you further resources on this approach.
- Your child has special needs. If your child is autistic, has a sensory disorder, or other special needs, I would direct you to another certified Oh Crap Potty Training consultant who has more experience with children with special needs.
